

Your Personal Protection & Safety Smartphone App

Security Dynamics

How the App works and what you see!

Remote Alert Personal Security and Safety App

How the App works and what you see!

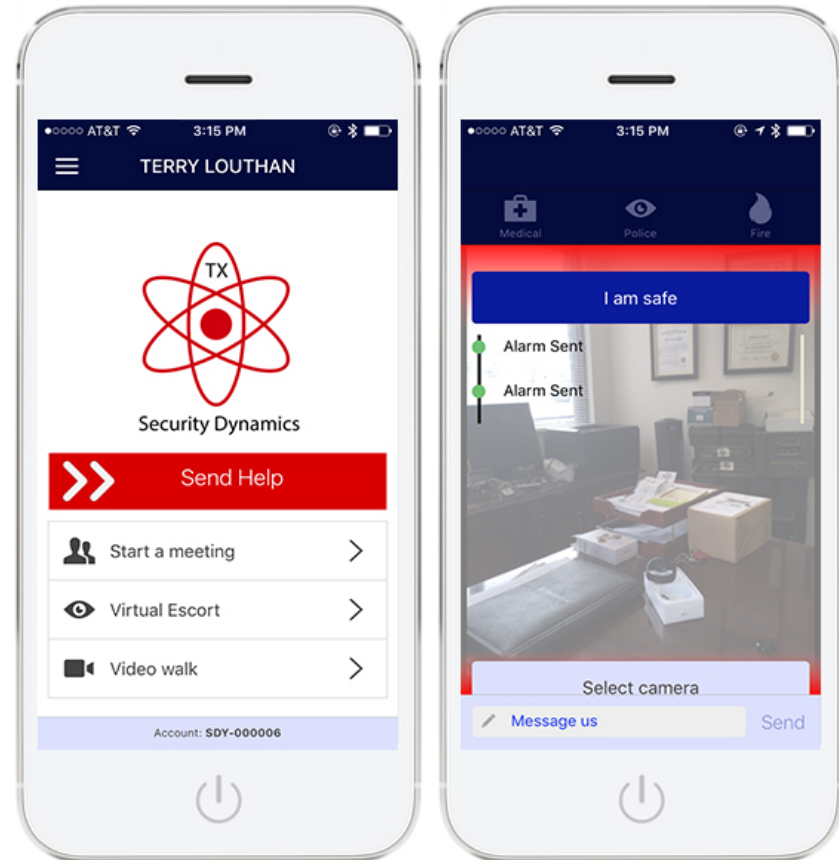

TX Security Dynamics
Personal Security and Safety App

There are two version of the app to choose from:

Personal Security and Safety App
Personal Security and Safety App with Video

The version with video also transmits a video and audio channel when an alarm is triggered which is used for alarm verification, the is also one addition feature called Video walk.

Video walk creates an alarm to the central station and will open a video and audio channel with your phone. If you need to walk to an area and don't feel safe the central station operator will stay on line with you till you reach a safe location.

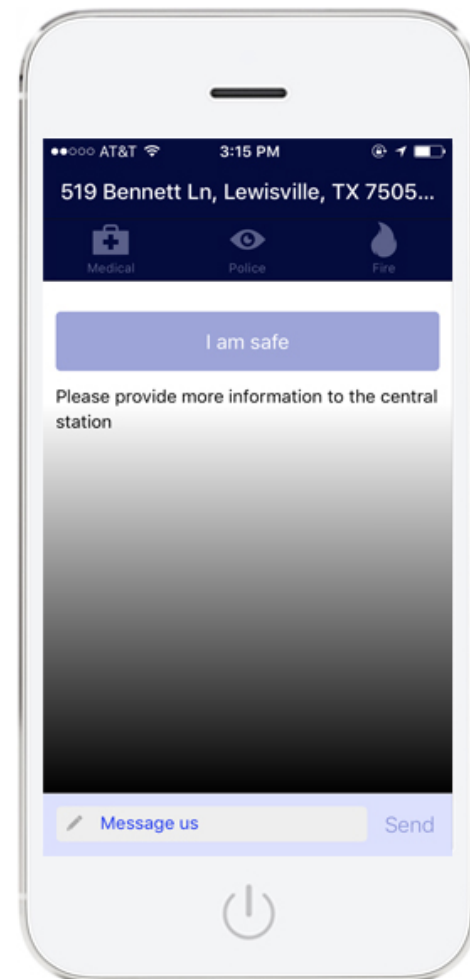

“Send Help”

“Send Help” is designed to allow the user to simply swipe their finger across the send help button to create a duress alarm to the central station.

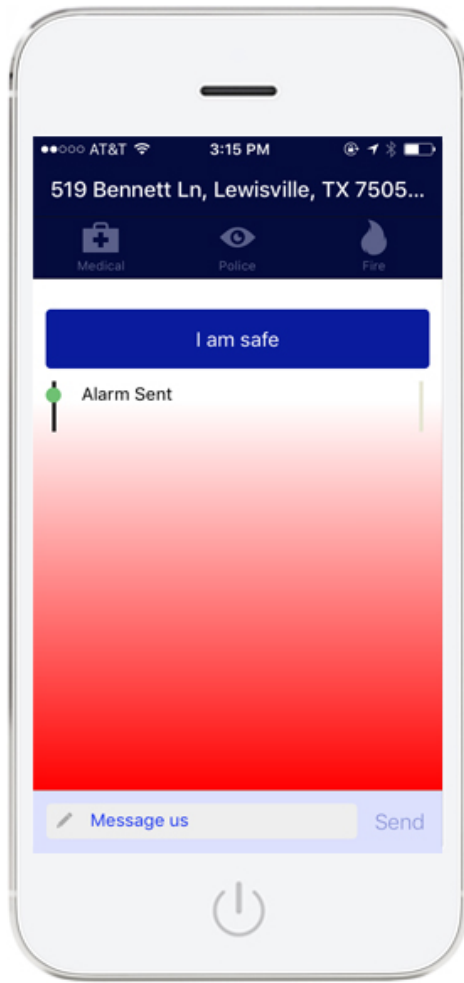

This is the Opening Screen

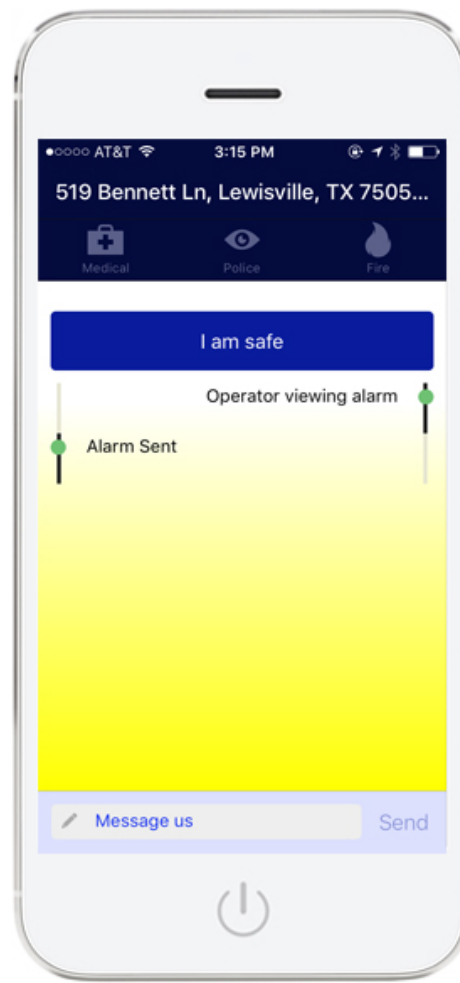

This is the App Locating you

How you know what's going on “Real Time Feedback”

Alarm has hit our system

Our operator is working your emergency

We have help on the way

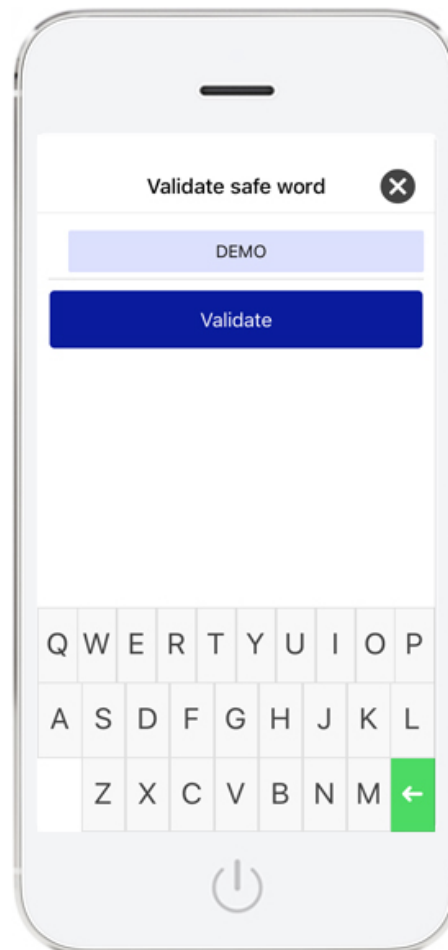

Note: At any point you can then use the “Text Box” to share information with the central station. Within the app there are also buttons for Medical, Police or Fire which the user may select any of those buttons to share more information about emergency.

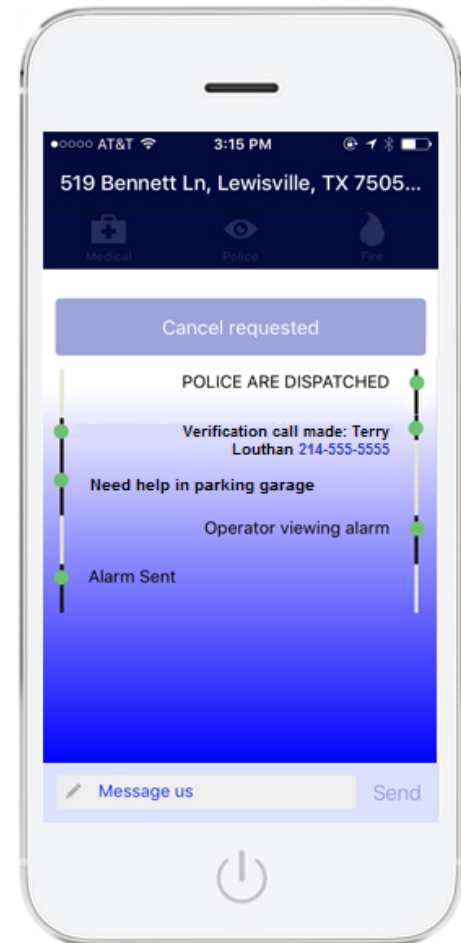

The user can cancel any alarm from the App with their password.

To cancel an alarm
press the "I am safe "
button

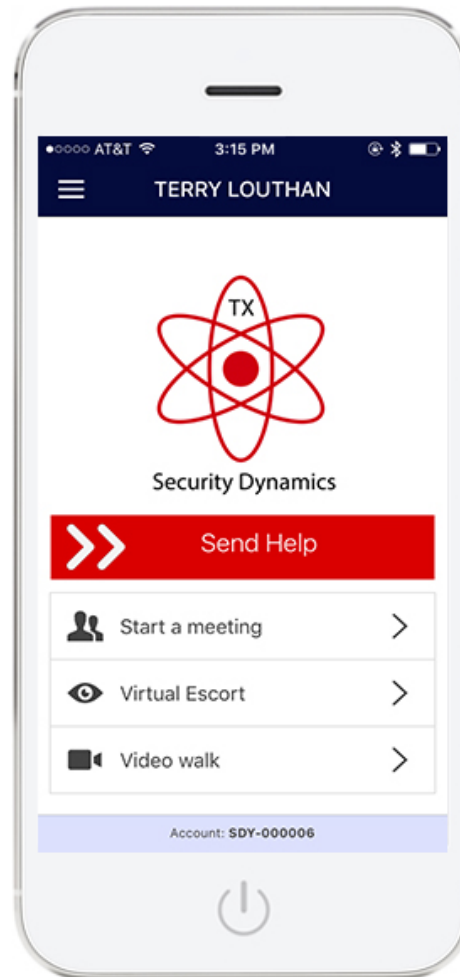

A valid safe word is required
to cancel the alarm. Once you
enter the safe word press
"Validate"

Users will see
confirmation of the
cancel request.

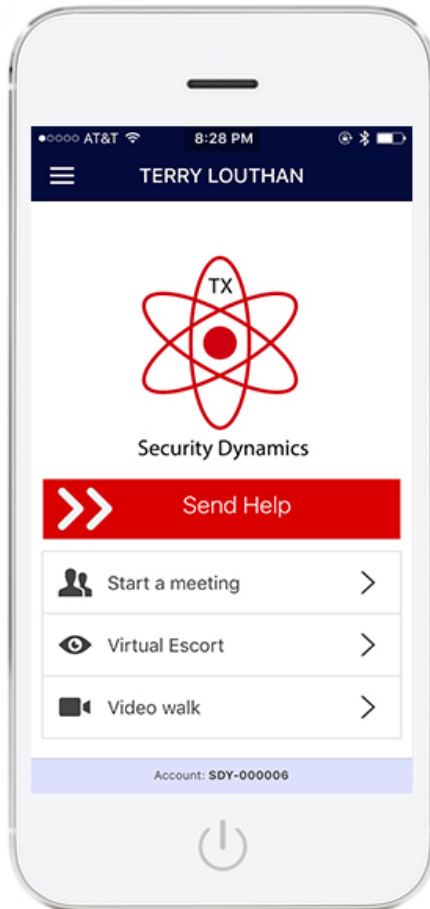

"Send Help" Ready for the next alert

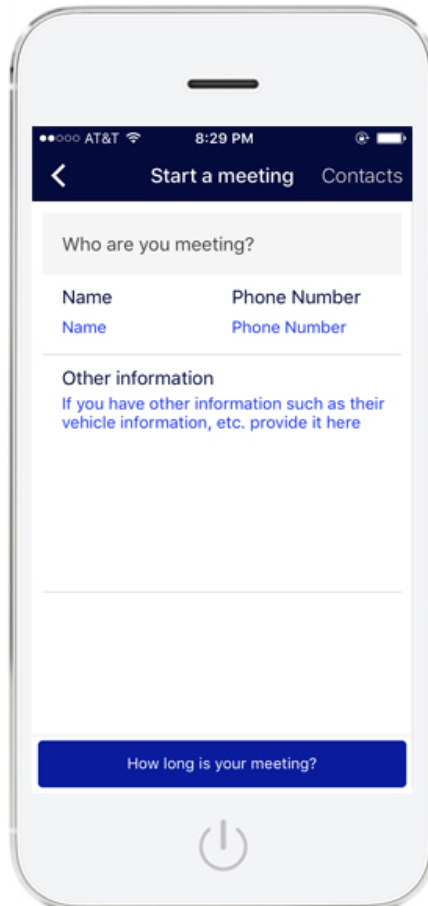

Once the alarm is cleared
the App will return to
main screen, ready for
next alert.

“Start a Meeting”

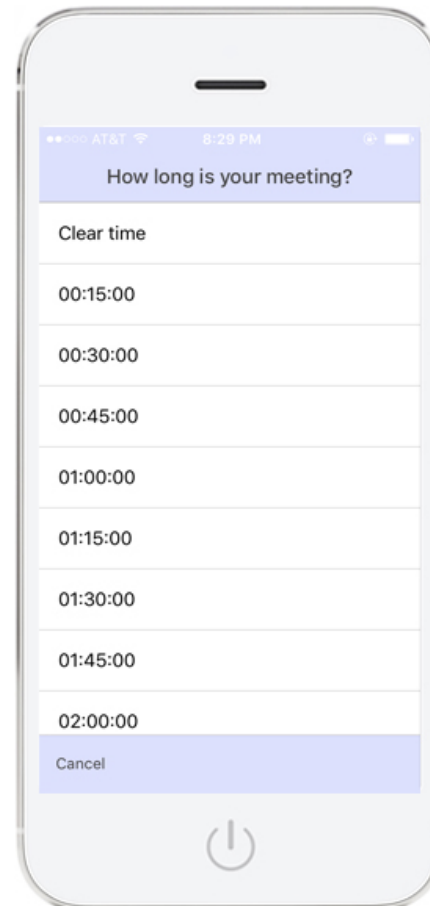

“Start a Meeting” allows the user to set meeting details and start a meeting timer from 15 minute to 120 minutes (2 Hours) Once activated the smart phone will send to our system your GPS location, the amount of time you have set it for along with the meeting details. The time will be kept in our system so even if the phone is turned off or destroyed we already have your data. If the timer expires a Duress alarm activation will occur. The time can be extended and or ended with a valid safe word.

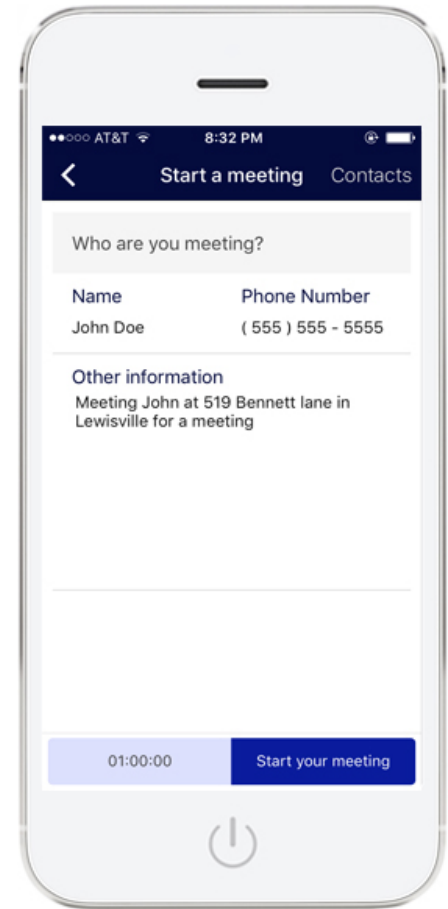

Push “Start a Meeting” to add your meeting details

The app allows you to add pertinent information about you meeting

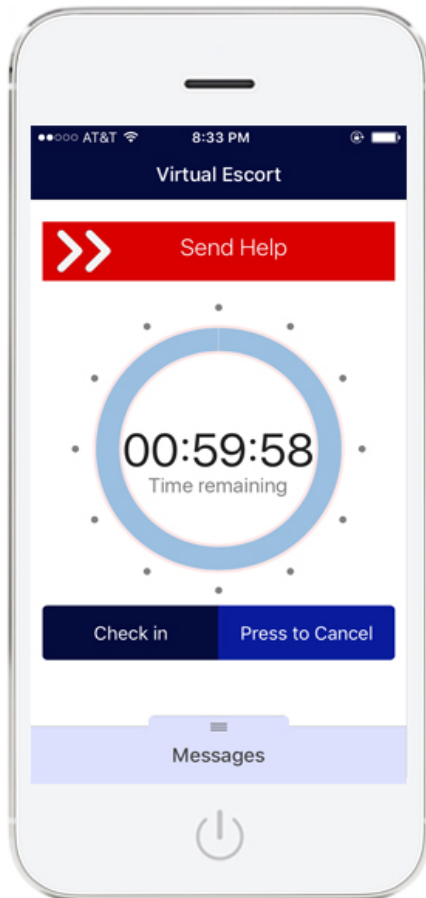

The meeting length can initially be set from 15 min to 120 min

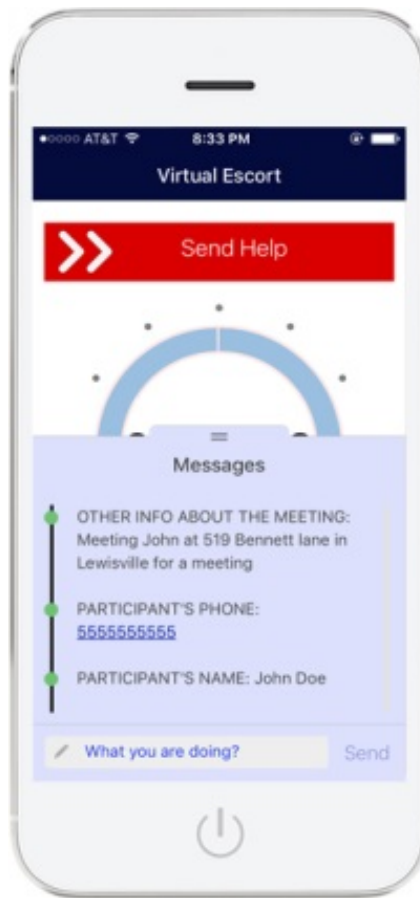

After selecting the time of you meeting press “Start my meeting” to activate .

“Start a Meeting”

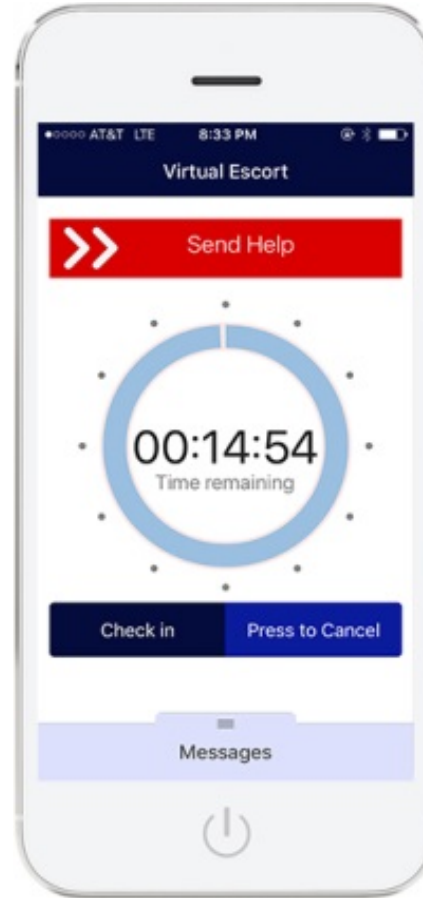

Another key feature of the “Keep me Safe Timer” is the ability to text information to our central station. At the bottom of the screen there is a text area, send pertinent information about your event before you start the timer, like who you are going to meet, exact location you are going , any information that would be beneficial for us to have, once you send this data it is captured and held in our software, if the event is triggered we will relay this information to the appropriate authorities.

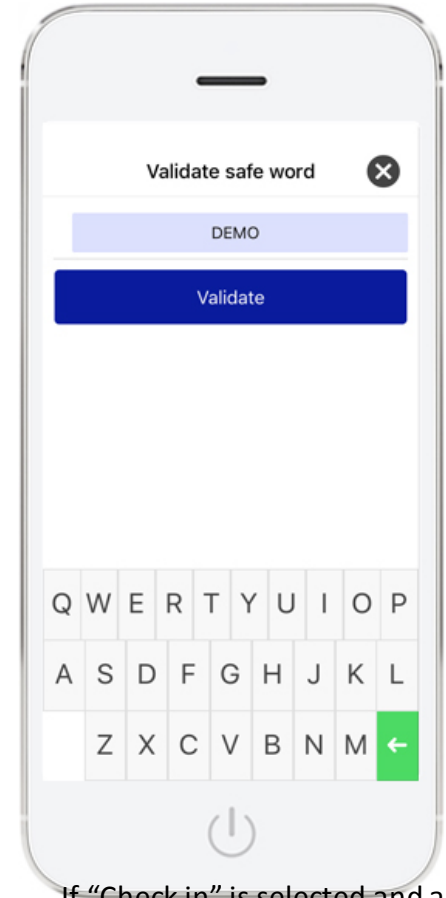

Once activated you will see the time counting down

If you select messages you will see the data that has been sent to the central station

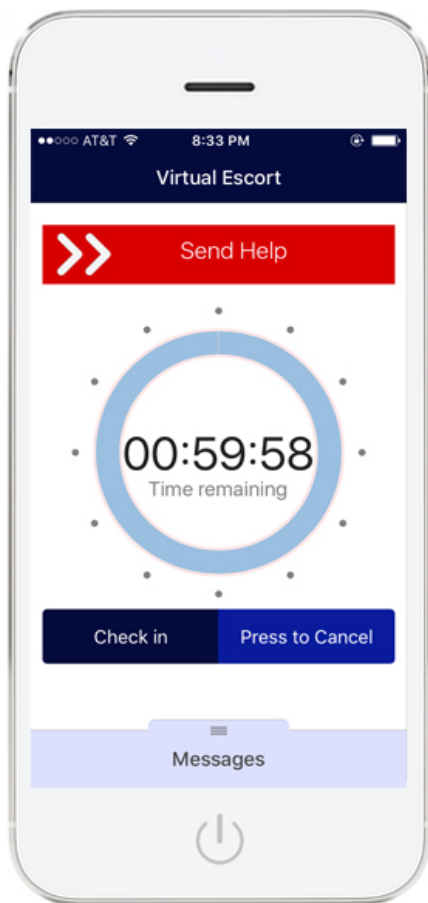

Once activated you can either cancel the time or extend the time with a valid safe word.

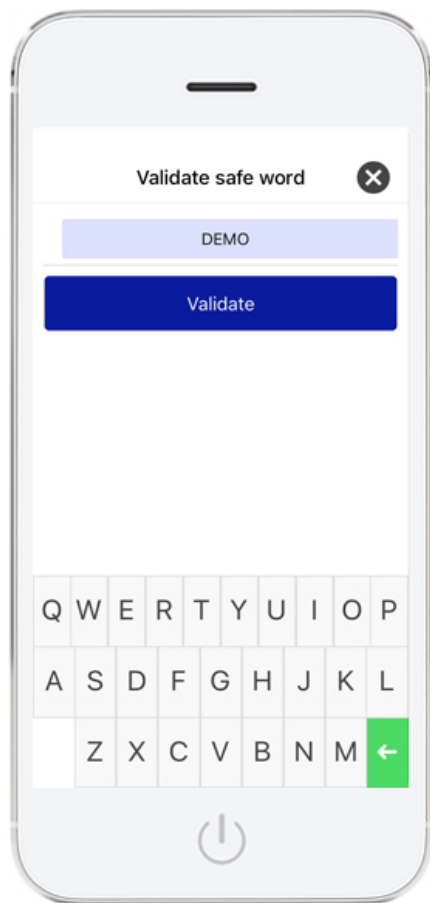

If “Check in” is selected and a valid safe word is entered the time will be reset to the original time of the meeting

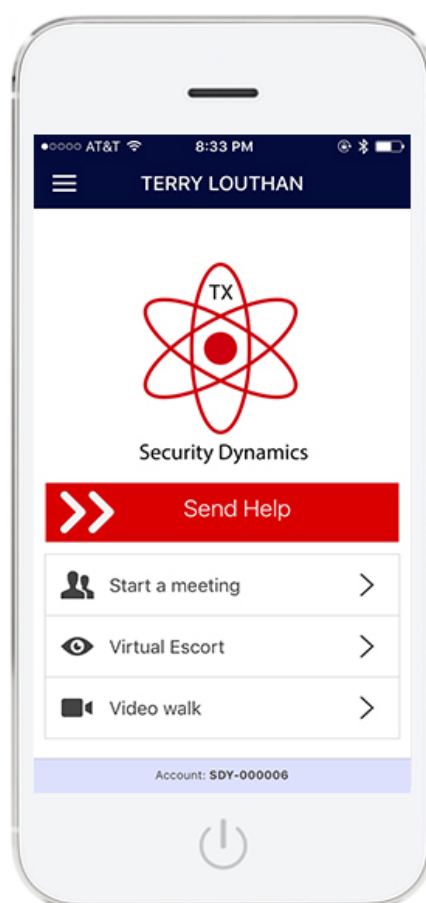

The user can extend the meeting time or cancel any alarm from the App with their password.

Timer reset to the original time of the meeting after you selected "Check in"

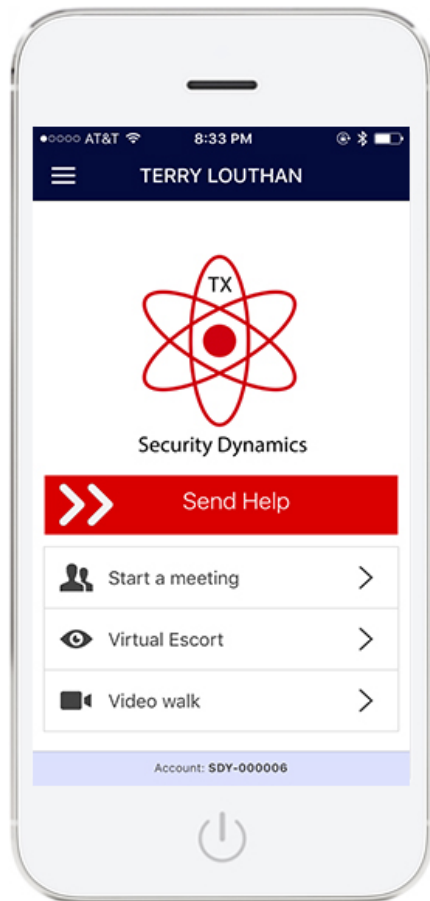

If "Press to Cancel" is selected and a valid safe word is entered the system will reset to the main screen

Ready for the next alert

“Virtual Escort”

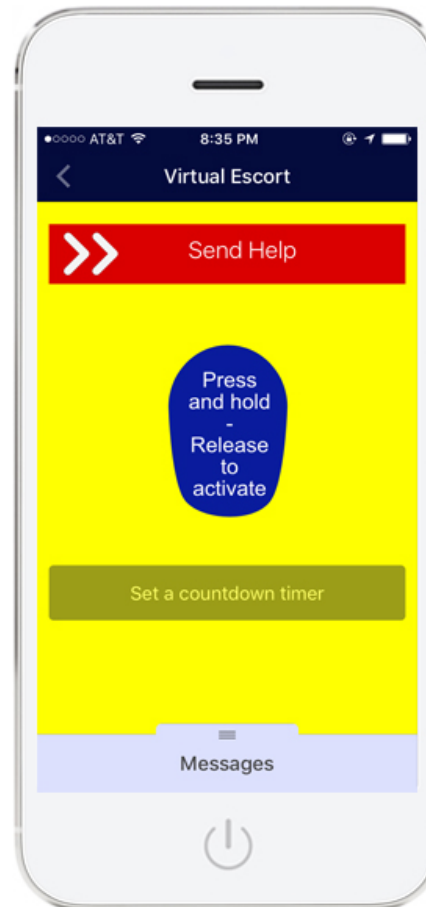

“Virtual Escort” is designed to allow the user to hold down a button on their smart phone in advance of being in a compromising situation, if help is required they would let go of the button, the user will have 5 seconds to cancel or allow the time to expire which will activate the alarm to the central station.

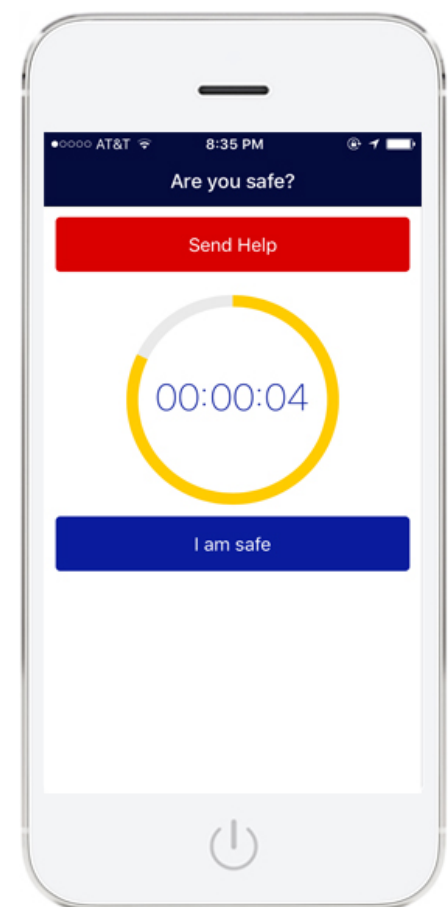

User selects
“Virtual Escort” Button

Place thumb on
“Virtual Escort” button
and hold

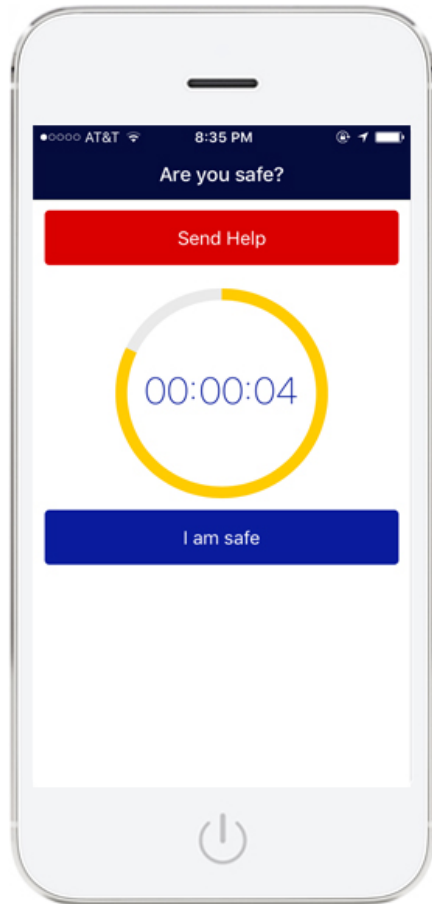

The back ground will turn yellow
to indicate “Send Help” has
been activated, to trigger an
alert simply remove your thumb

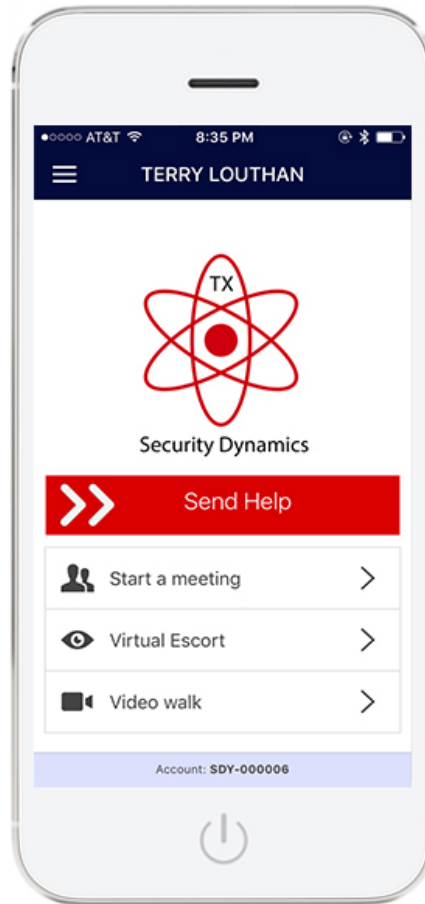

The user will have 5 Sec to
cancel or allow the duress
alarm to be activated

“Virtual Escort”

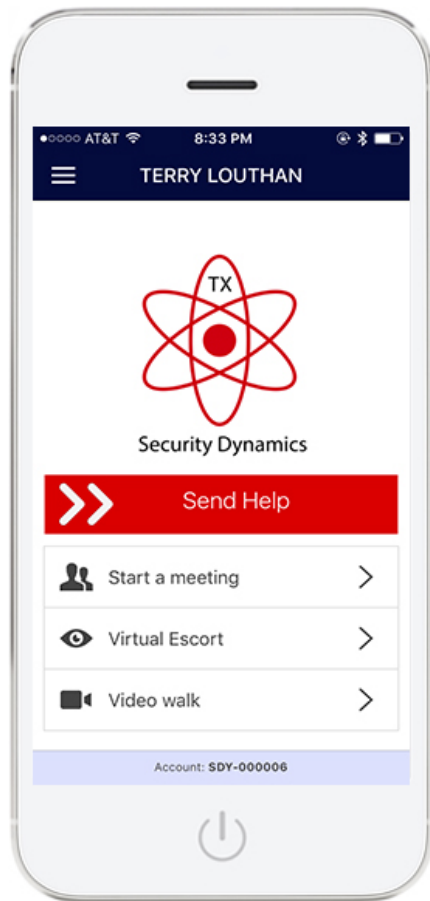

User selects
“I am Safe” Button to
cancel the alert

If “I am Safe” is selected
before the time expires the
system will reset to the main
screen ready for the next alert

“Keep Me Safe Timer”

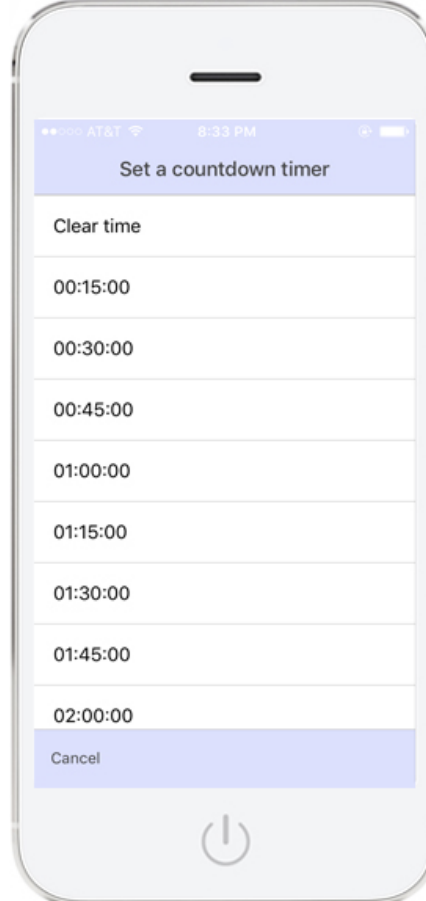

“Keep me Safe Timer” allows the user to start a timer from 5 minute to 120 minutes (2 Hours)
At the start of the “Safety timer” the smart phone will send to our system your GPS location and the amount of time you have set it for. The time will be kept in our system so even if the phone is turned off or destroyed we already have your data , if the timer expires a Duress alarm activation will occur. The timer can be extended and or ended with a valid password.

Push “Virtual Escort” to access the safety timer.

Push “Set a countdown timer” to set desired time

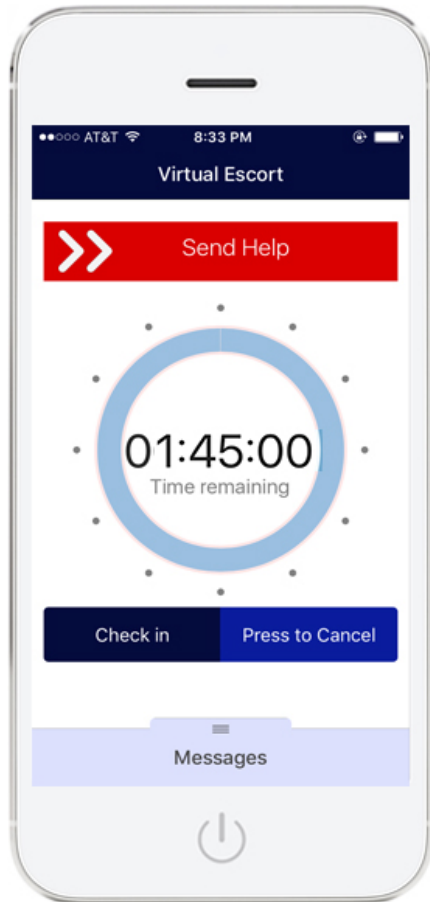

The meeting length can initially be set from 15 min to 120 min

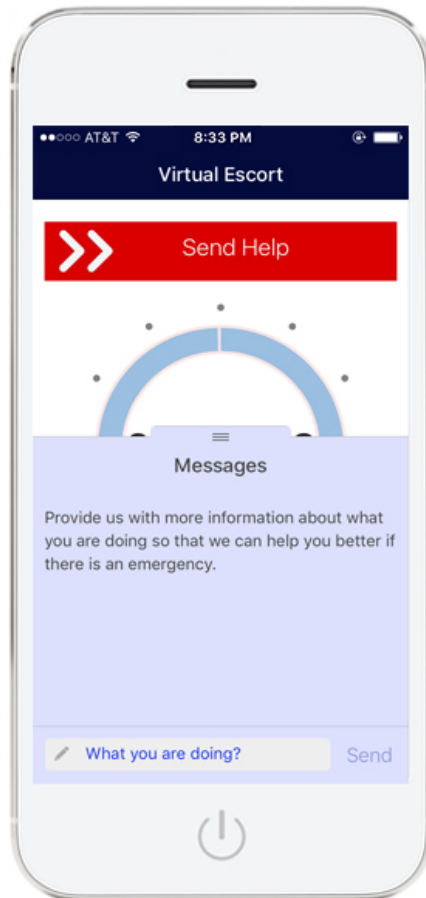

Press “Activate timer” now the system will start to count down

“Keep Me Safe Timer”

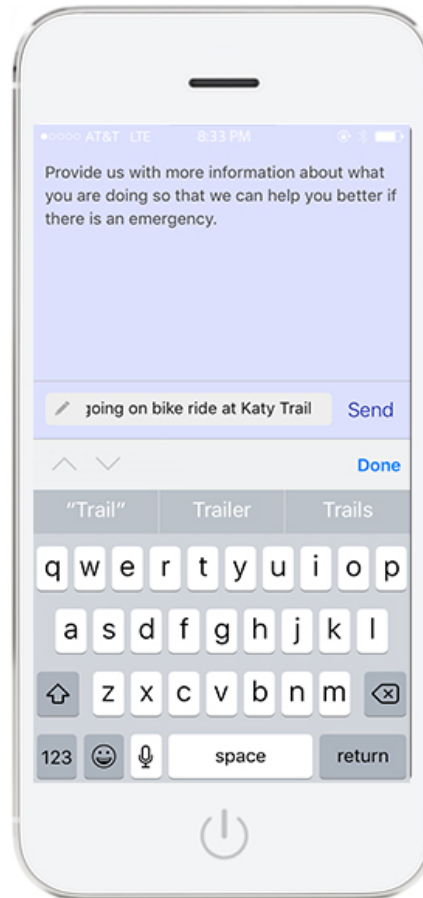

Send information that may be helpful to the authorities should an event occur

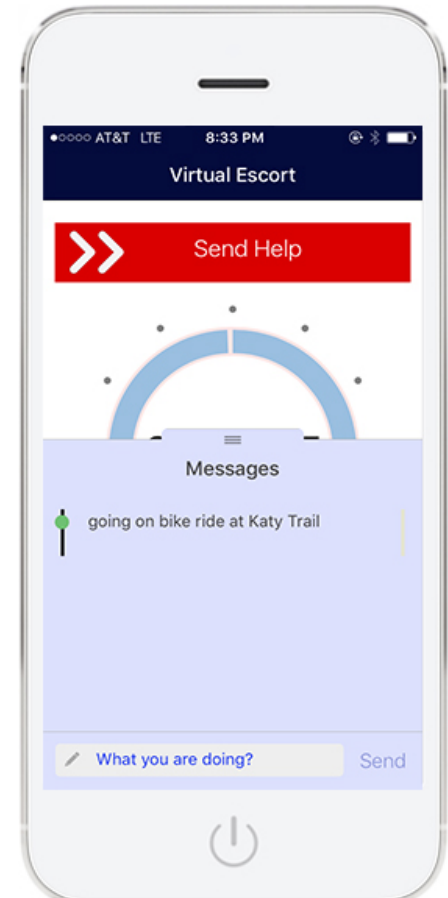

Time shown was adjusted
from the dial

You can send messages
directly to our central
station software

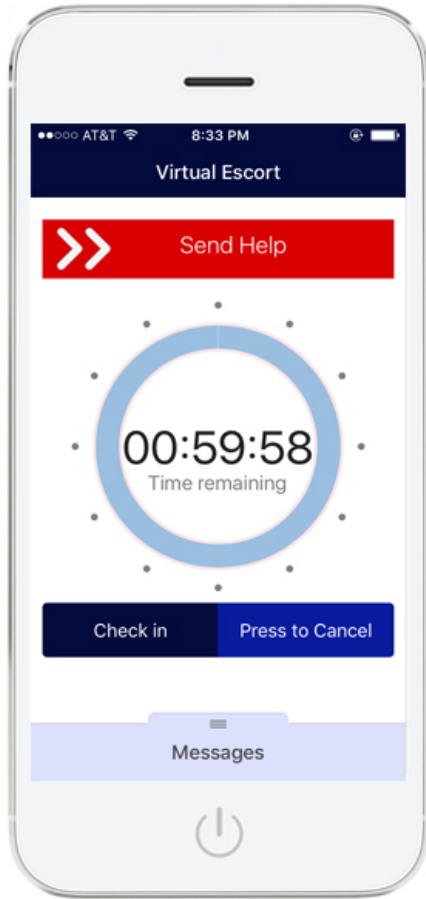

Select messages and type any information
that may be helpful to the authorities
should an event occur

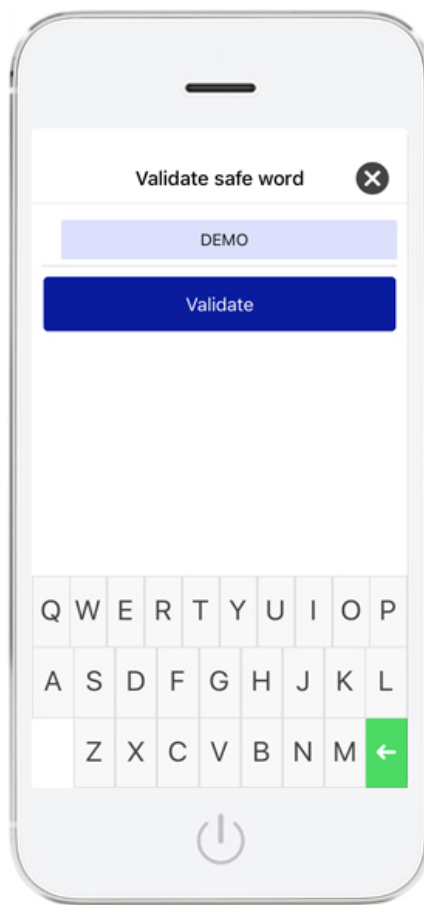

After pressing send, the
message will be displayed

“Keep Me Safe Timer”

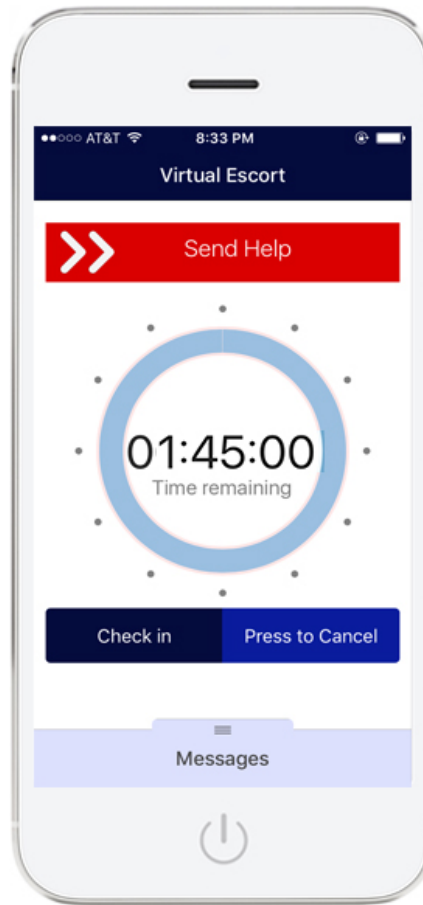

The user can extend the safety timer or cancel any alarm from the App with their safe word.

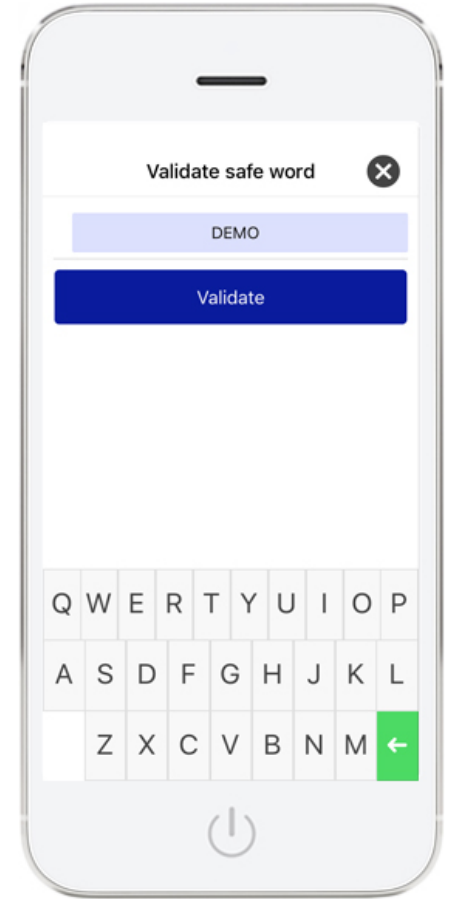

Once activated you can either cancel the time or extend the time with a valid safe word.

If “Check in” is selected and a valid safe word is entered the time will be reset to your original selection

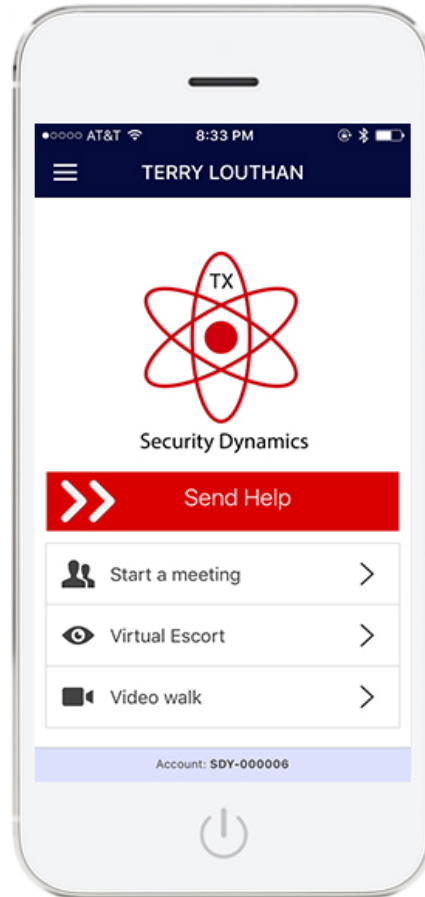

Timer reset to allow more time for your event

If “Press to Cancel” is selected and a valid safe word is entered the system will reset to the main screen

“Keep Me Safe Timer”

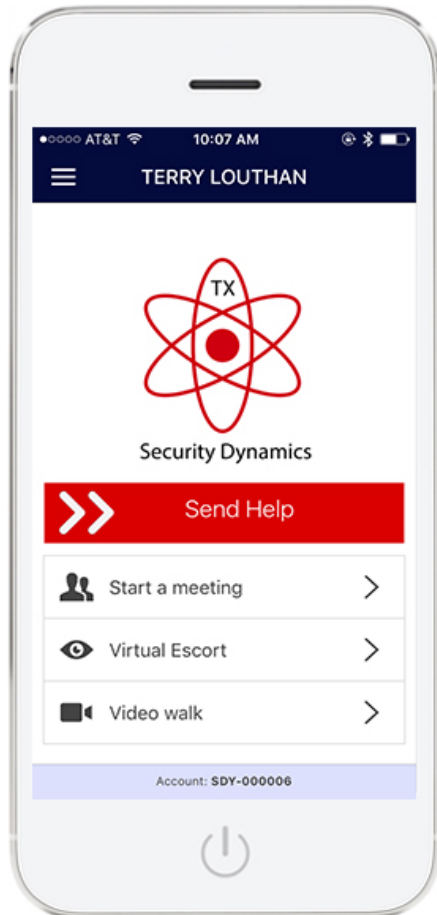

Ready for the next alert

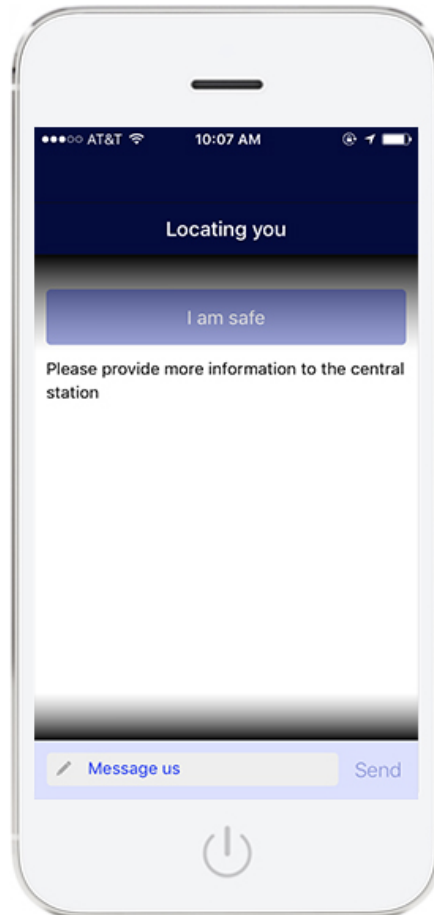

“Video Walk” Feature

“Video Walk” is designed to allow the user to simply press the video walk button to create an alarm to the central station which in turn will open a live video and audio channel to the phone.

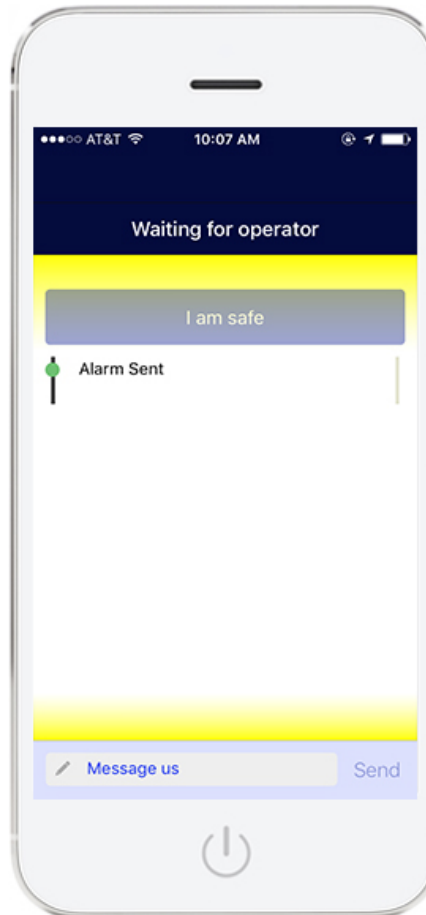

The operator will stay on line with you and will be viewing the video from your phone as you walk to your next location.

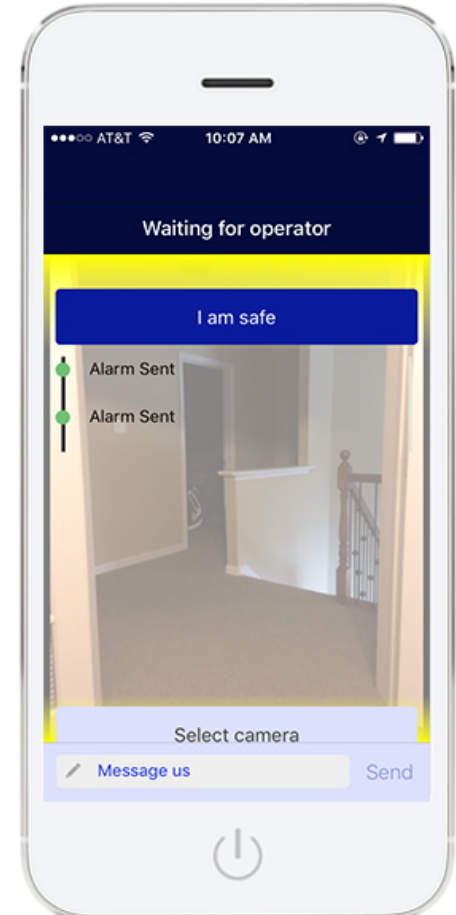

After payment is confirmed the App will take you to the main screen, Reay for an alert.

This is the App locating you

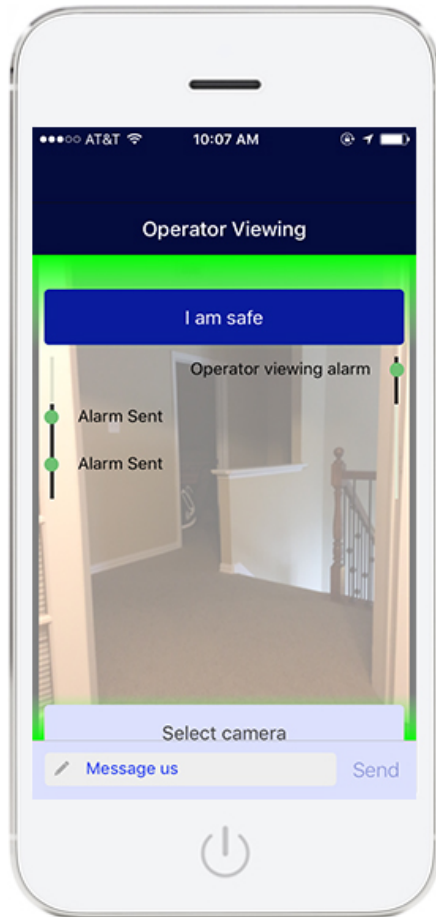

Alarm is waiting on operator

Video channel opens

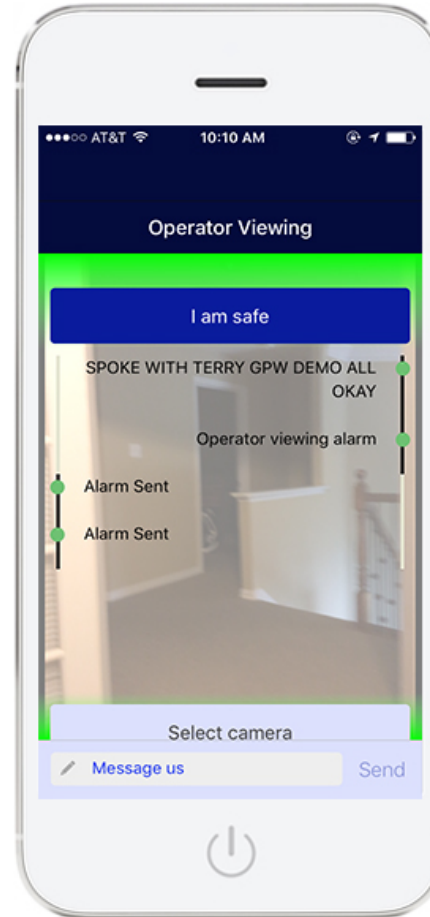

Video Walk Feature

Operator viewing alarm

Operator opened two way audio channel

Operator closing event

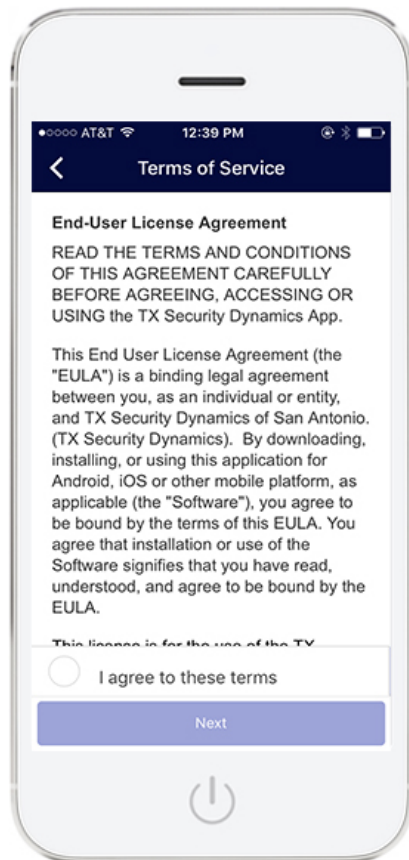

App returns to main screen ready for the next alert

How to add a Device (Emergency Button)

Once the system finds the button select "Connect"

Once connected you will see this screen

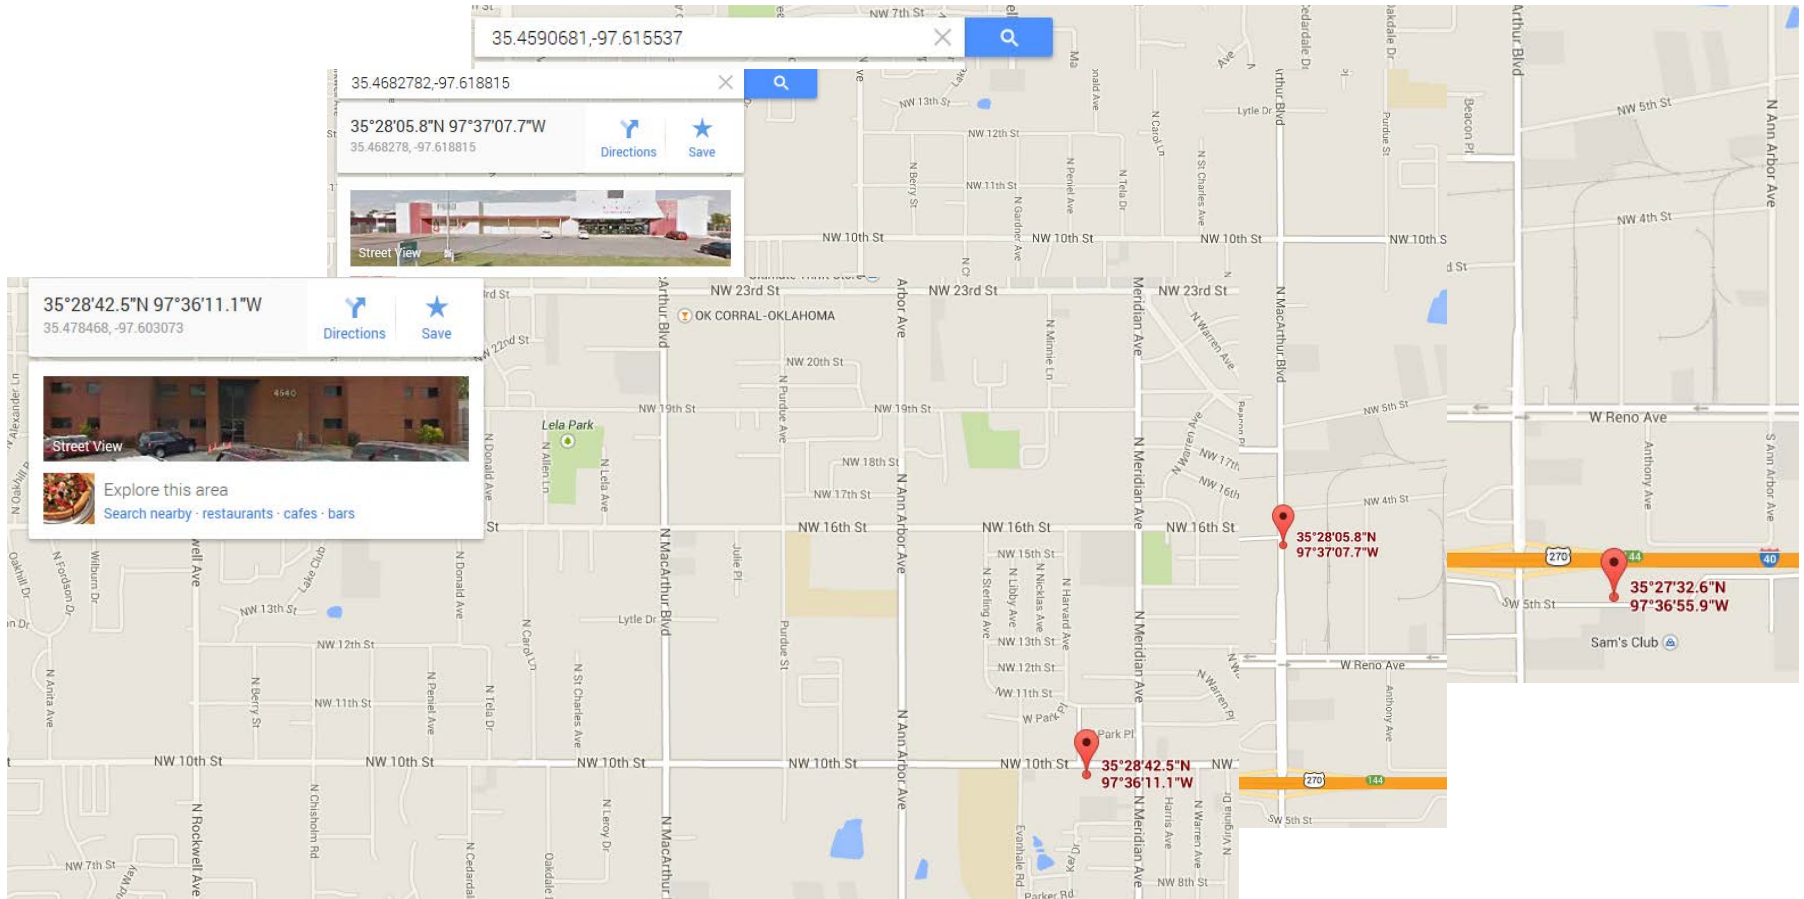

If you want fall detection to be active also select that feature

Once complete hit the back button to return to the main menu as the button has been added.

Keep up with smart phone

Once the app has been triggered it has a feature that if the Smart Phone moves more than 25 meters (approx. 82 feet) it will re-transmit the GPS location to us so we track the location.

The Monitoring Side

Our monitoring center has been in business since 2003, as a UL Listed Monitoring Center we have operators on duty 24/7 who understand how to handle these emergency situations and work with Police, Fire and Medical personnel to get the right individuals needed for your emergency. Our software will pull up the appropriate agency by event and GPS location to ensure the fastest responses possible.
